## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important work, surface formation, and date anticipate spudding-in.)

1. Approximately 250' of 10-3/4" 40# surface casing cemented to surface will be set. An adequate intermediate string will be set if circumstances so warrant.
2. Well is to test the Mesaverde formation by drilling through the Castlegate member and into the Mancos formation.
3. Well to be rotary drilled with air as circulating medium.
4. Gamma ray - Neutron log will be run.
5. Probable formation tops: Green River, Surface; Wasatch, 2150'; Mesaverde 3400'.

I understand that this plan of work must receive approval in writing by the Commission before operations may be commenced.

### DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important work, surface formation, and date anticipate spudding-in.)

Completion is being attempted from several sands in the lower Mesa Verde formation.

Testing to date has yielded inconclusive results. Formation water is still hampering completion efforts and additional work to squeeze off the water producing sands will be necessary before completion can be accomplished.

We intend to temporarily suspend operations because of winter weather conditions until Spring, 1961.

I understand that this plan of work must receive approval in writing by the Commission before operations may be commenced.

Gentlemen:

We have sent repeated requests for the well log and electric and/or radioactivity logs for the above mentioned well. Rule C-5 (a) of our General Rules and Regulations reads as follows:

Within ninety (90) days after the suspension of operations on, abandonment of, or the completion of any well drilled for the production of oil or gas, and within ninety (90) days after the completion of any further operations on it, if such operations involved drilling deeper or drilling or re-drilling any formation, a well log shall be filed with the Commission, on a form prescribed by the Commission, as well as a copy of the electric and radioactivity logs, if run. A legible copy, a carbon or otherwise, of the report filed with the Oil and Gas Leasing Branch of the U. S. Geological Survey will be considered compliance.

Our records indicate that operations were suspended on this well on November 30, 1961. Under the above mentioned rule said logs should have been filed not later than February 1, 1962. Therefore, you are hereby requested to file a drillers log as well as all electric logs on this well without any further delay.

Attention: Cleon B. Feight, Executive Director

Gentlemen:

In compliance with your request of January 15, 1963, for the well log and mechanical logs of the Preston M. Neilson - Sweetwater Creek Unit #1 Well located in Section 26, T. 13 S., R. 23 E., S. L. M., Uintah County, Utah, we are sending you herewith one copy each of the following:

1. Log of Oil and Gas Well (Form OGCC-3)
2. Gamma Ray-Neutron Log
3. Minilog/Caliper Log
4. Induction Electric Log

We trust that these logs will bring us up to date with respect to the required reports for said well. If, however, we are delinquent with other information, we shall appreciate your letting us know of such deficiency.

Very truly yours,

### HISTORY OF OIL OR GAS WELL

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "sidetracked" or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and results of pumping or bailing.
